

ELD DEVICE CERTIFICATION INFORMATION

Legal Disclaimer: The information contained in this document is intended for informational purposes only and is not to be considered as legal advice. Compliance with the ELD Mandate and FMCSA rules and regulations is the sole responsibility of the ELD Provider.*

Below you will find CERTIFICATION STEPS with the example texts and images that may be used for the certification process:

1. Log into your ELD Provider Portal <https://eld.fmcsa.dot.gov/Account/Login> and click on the menu item "Register Your ELD".

2. Fill out the form with the following information:

Product Name

S-LANE ELD

Software Version

2.99.01 or higher

Model Number

SLNET1

ELD Identifier (a six-character alphanumeric identifier assigned to this device by its manufacturer)

SLN515

Supported Data Transfer Methods

Select both Web Service and Email (do NOT select Local)

Supported Data	Local: Select Both	Telematic: Select Both
Transfer Methods:	☐ USB	☒ Webservice
	☐ Bluetooth	☒ Email

Picture of Device

Please upload the provided PNG file:  S-LANE ELD Picture.png

User's Manual

Please upload the provided PDF file:  S-LANE ELD Manual.pdf

Public Key Certificate

Please upload the provided PEM file: [public_cert2.pem](#)

Supported Data Transfer Description

Driver logs are transferred through the ELD system using an electronic data transfer method, delivering a comprehensive overview of their records. Accessing this information within the application is straightforward, and the ELD streamlines the transfer of telematics data through email or web services. Drivers initiate the transfer process by navigating to the DOT Mode menu and selecting the "Send" option. The presentation of the logs report to a DOT officer on the driver's mobile device.

ELD Malfunctions

To provide a thorough account of malfunctions within the specified timeframe, the S-LANE ELD and diagnostic events in accordance with Section 4.6, guaranteeing adherence to technical requirements and the detection of data inconsistencies. If any inconsistencies are detected, they are logged as malfunction events, and the driver is visually alerted. To classify compliance malfunctions and diagnostic events specific codes are used:

- P for "Power compliance" malfunction,
- E for "Engine synchronization compliance" malfunction,
- T for "Timing compliance" malfunction,
- L for "Positioning compliance" malfunction,
- R for "Data recording compliance" malfunction,
- S for "Data transfer compliance" malfunction,
- O for "Other" ELD-detected malfunctions,
- 1 for "Power data diagnostic" event,
- 2 for "Engine synchronization data diagnostic" event,
- 3 for "Missing required data elements data diagnostic" event,
- 4 for "Data transfer data diagnostic" event,
- 5 for "Unidentified driving records data diagnostic" event
- 6 for "Other" ELD-identified diagnostic events

Procedure to validate the ELD authentication value

A fixed-size alphanumeric authentication value is produced using a cryptographic hash function to fulfill the criteria laid out in section 7.14. The widely used MD5 hash function is applied to create a 32-digit hexadecimal value that adheres to the mandated maximum data range and length. To accomplish this, the MD5 hash function receives concatenated transmitted data elements, as specified in section 4.8.2.1, and the FMCSA-provided authentication key, as outlined in section 5.1.3. This technique allows for the verification of an ELD utilized in driver log recording, as described in sections 5.2.2 and 7.14, by incorporating both the "ELD Identifier" data element and the FMCSA authentication key in the form of a certificate component.

Certifying Statement

Extensive testing, following internal procedures and the FMCSA's Test Plan and Procedures, validates the compliance of the ELD with the requirements for ELD solutions outlined in 49 CFR part 395, subpart B, appendix A.

3. Let us know when the ELD Device Certification registration is submitted.

4. Provide us with “ELD Registration ID” when the ELD Device Certification registration is approved (may take several weeks) and we will add it to your ELD app. (To find the ELD Registration ID, go to your FMCSA account, click on “Manage Your Devices” and click on your registered ELD.

**Please, note that, as an independent ELD Provider, it is your sole responsibility to ensure that your registered solution functions properly and fully complies with the ELD Mandate and FMCSA rules and regulations. This includes all components of the ELD system, including those from third parties. It is therefore essential that you conduct comprehensive testing to confirm compliance with all necessary rules and regulations. To aid in this, the FMCSA provides extensive ELD testing procedures, available at this link:*
